EDUCATION

COLUMBIA BUSINESS SCHOOL

MS, Financial Economics

First Year Coursework: Computing for Finance, (PhD) Finance Theory, Capital Markets & Investments, (PhD) Econometrics and Statistical Inference II

New York, NY

Aug 2026-May 2028

TECHNICAL UNIVERSITY OF MUNICH

BS, Technology and Management, *Minor:* Computer Engineering

Scholarship: Ranked 879th of ~2 million candidates in Turkey's national STEM entrance exam; awarded merit scholarship to Koç University but elected to attend TUM

Quantitative Coursework: Linear Algebra, Multivariable Calculus, Probability Theory, Statistics & Optimization

Munich, Germany

Oct 2021-Aug 2024

EXPERIENCE

IS INVESTMENT

Leading Turkish investment bank, brokerage, and warrant market maker in Turkey

Istanbul, Turkey

Nov 2024-Jun 2026

Derivatives Trader II on Warrant Market Making Desk (2025-2026)

- Managed a nine-warrant derivatives portfolio across gold, silver, and MAG7 equities, generating approximately \$6M in annual profit on a seven-person desk producing \$40M+ annually
- Formed and defended directional and volatility views on equities and precious metals, presenting positioning rationale and risk exposures to the MD and VP in daily reviews
- Calibrated the implied volatility inputs behind issuance cycles averaging 500+ warrants, extracting live implied vol and mapping the volatility term structure across strikes and expiries in Bloomberg, and delivering the surface to the MD to set final issuance pricing levels

Derivatives Trader I on Warrant Market Making Desk (2024-2025) (Promoted after 1 year)

- Built and validated Black-Scholes and Black-76 pricing models in Excel VBA for equity, precious-metal, and futures warrants, integrating option pricings and real-time Greeks to continuously cross-check quotations against live market prices and hedge the desk's book
- Automated forward pricing and P&L attribution in Python, replacing manual Excel workflows and cutting daily valuation time by 50%; trained desk colleagues on the tool to drive adoption
- Identified and executed arbitrage across BIST30 futures expiries and between warrants and their underlying equities using the desk's custom-built market making screens, contributing roughly 2% of the daily desk P&L

ACADEMIC PROJECT

SAP SE

- Led a comparative IFRS/US GAAP analysis of SAP's global Buy-Sell subcontracting and built a six-step financial statement framework tested on NVIDIA's 10-K and Ferrari N.V.'s annual report; presented findings to SAP, awarded the top grade

Munich, Germany

Winter 2024

EXTRACURRICULAR ACTIVITIES

Trading

- **Personal Capital:** Generated \$88.7K net P&L (after \$21.1K commissions) from a \$4K starting account over 13 months, at a 64.5%-win rate and 2.36 profit factor by executing 1,692 discretionary trades through a self-built Python/API workflow
- Held maximum drawdown to 12.8% across 13 months (10 profitable) at a 3.6% daily return standard deviation, tracked through a per-trade P&L attribution journal; diagnosed a fat-tailed return distribution — top 5% of trades produced 50% of gross profit — and a capacity constraint as risk per unit of capital compressed with account growth
- **Prop Trading Capital:** Passed two-phase evaluations at three proprietary trading firms (FundedNext, Crypto Fund Trader, Breakout Trading) to trade \$600K in aggregate capital, clearing a +8% Phase 1 and +6% Phase 2 profit target under a 6% maximum drawdown and 4% daily loss limit at every stage
- Withdrew profit payouts of more than 2% of notional capital from all three firms, managing risk through predefined stop-losses and a minimum 2:1 reward-to-risk target per trade, and sizing positions to keep realized drawdown inside a 4% daily loss cap

May 2021-Nov 2024

SKILLS & CERTIFICATIONS

Technical Skills: Bloomberg, Python (pandas, NumPy), Excel VBA, R, WebSocket Exchange APIs

Certifications: CFA Level II Candidate (2026), CFA Level I passed above the 90th percentile

Trading & Markets: Arbitrage, Options pricing and volatility surfaces, Delta/gamma hedging, Derivatives, Market making

Languages: Turkish (native), German (fluent)

Interests: Competitive basketball (former team captain), Fenerbahce (Soccer) Fan, Travel across 35+ countries, Poker, Catan
