Quantitative Coursework: Linear Algebra, Multivariable Calculus, Probability Theory, Statistics & Optimization

EXPERIENCE

IS INVESTMENT

Istanbul, Turkey

Leading investment bank, brokerage, and warrant market maker in Turkey

Nov 2024-Jun 2026

Derivatives Trader II on Warrant Market Making Desk (2025-2026)

- Managed a derivatives portfolio across gold, silver, and MAG7 equities, generating approximately \$6M in annual profit on a seven-person desk producing \$40M+ annually
- Formed and defended directional and volatility views on equities and precious metals, presenting positioning rationale and risk exposures to the MD and VP in daily reviews
- Mapped Bloomberg implied-volatility surfaces across strikes and maturities to inform issuance cycles averaging 500+ warrants; provided inputs to the MD for final pricing decisions

Derivatives Trader I on Warrant Market Making Desk (2024-2025) (Promoted after 1 year)

- Built and validated Black-Scholes and Black-76 pricing models in Excel VBA for equity, precious-metal, and futures warrants, integrating option prices and real-time Greeks to continuously monitor quotations against live market prices and hedge the desk's book
- Automated forward pricing and P&L attribution in Python, replacing manual Excel workflows and cutting daily valuation time by 50%; trained desk colleagues on the tool to drive adoption
- Identified and executed arbitrage across BIST30 futures expiries and between warrants and their underlying equities using the desk's market making screens, contributing roughly 2% of the daily desk P&L

ACADEMIC PROJECT

Munich, Germany

SAP SE

Winter 2024

- Led a comparative IFRS/US GAAP analysis of SAP's global Buy-Sell subcontracting and built a six-step financial statement framework tested on NVIDIA's 10-K and Ferrari N.V.'s annual report; presented findings to SAP, awarded the top grade

INDEPENDENT TRADING

May 2021-Nov 2024

- Personal Capital:** Generated \$88.7K net P&L (after \$21.1K commissions) from a \$4K starting account over 13 months by executing 1,692 discretionary trades in digital-asset perpetual futures through a self-built Python/API workflow
- Achieved a 64.5% win rate, 5.35 Sharpe and 2.36 profit factor, with a 12.8% maximum drawdown and 10 profitable months over 13 months; trade-level analysis showed that the top 5% of trades generated approximately 50% of gross profit.
- Prop Trading Capital:** Passed two-phase evaluations at three proprietary trading firms (FundedNext, Crypto Fund Trader, Breakout Trading) to trade \$600K in aggregate capital, clearing a +8% Phase 1 and +6% Phase 2 profit target under a 6% maximum drawdown and 4% daily loss limit at every stage
- Withdrew profit payouts of more than 2% of notional capital from all three firms, managing risk through predefined stop-losses and a minimum 2:1 reward-to-risk target per trade, and sizing positions to keep realized drawdown inside a 4% daily loss cap

SKILLS & CERTIFICATIONS

Technical Skills: Bloomberg, Python (pandas, NumPy), Excel VBA, R, WebSocket Exchange APIs

Certifications: CFA Level II Candidate (2026), CFA Level I passed above the 90th percentile

Trading & Markets: Arbitrage, Options pricing and volatility surfaces, Delta/gamma hedging, Derivatives, Market making
