TECHNICAL UNIVERSITY OF MUNICH

BS, Technology and Management, Aug 2024

Munich, Germany

2021-2024

Minor: Computer Engineering

Scholarship: Ranked 879th of ~2 million candidates in Turkey's national STEM entrance exam; awarded merit scholarship to Koç University but elected to attend TUM

Quantitative Coursework: Linear Algebra, Multivariable Calculus, Probability Theory, Statistics & Optimization

EXPERIENCE

IS INVESTMENT

Istanbul, Turkey

Leading Turkish investment bank and brokerage firm; largest warrant market maker in Turkey

2024-2026

Derivatives Trader II on Warrant Market Making Desk (2025-2026)

- Managed a nine-warrant derivatives portfolio across gold, silver, and MAG7 equities, generating approximately \$6M in annual profit on a seven-person desk producing \$40M+ annually
- Formed and defended directional and volatility views on MAG7 equities and precious metals, presenting positioning rationale and risk exposures to the Director and VP in daily reviews

Derivatives Trader I on Warrant Market Making Desk (2024-2025) (Promoted after 1 year)

- Built and validated Black-Scholes and Black-76 pricing models in Excel VBA for equity, precious-metal, and futures warrants, integrating option pricings and real-time Greeks to continuously cross-check quotations against live market prices and hedge the desk's book
- Automated forward pricing and P&L attribution in Python, replacing manual Excel workflows and cutting daily valuation time by 50%; trained desk colleagues on the tool to drive adoption
- Identified and executed arbitrage across BIST30 futures expiries and between warrants and their underlying equities using the desk's custom-built market making screens, contributing roughly 2% of the daily desk P&L

SAP SE

Munich, Germany

Project Study in partnership with Technical University of Munich

Winter 2024

- Led a comparative IFRS/US GAAP analysis of SAP's global Buy-Sell subcontracting and built a six-step financial statement framework tested on NVIDIA's 10-K and Ferrari N.V.'s annual report; presented findings to SAP, awarded the top grade

ADDITIONAL EXPERIENCE

2021-2024

Trading

- Personal Capital:** Generated \$88.7K net P&L (after \$21.1K commissions) from a \$4K starting account over 13 months, at a 64.5%-win rate and 2.36 profit factor by executing 1,692 discretionary trades through a self-built Python/API workflow.
- Held maximum drawdown to 12.8% across 13 months (10 profitable) at a 3.6% daily return standard deviation, tracked through a per-trade P&L attribution journal; diagnosed a fat-tailed return distribution — top 5% of trades produced 50% of gross profit — and a capacity constraint as risk per unit of capital compressed with account growth.
- Prop Trading Capital:** Passed two-phase evaluations at three proprietary trading firms (FundedNext, Crypto Fund Trader, Breakout Trading) to trade \$600K in aggregate capital, clearing a +8% Phase 1 and +6% Phase 2 profit target under a 6% maximum drawdown and 4% daily loss limit at every stage.
- Withdrew profit payouts from all three firms, managing risk through predefined stop-losses and a minimum 2:1 reward-to-risk target per trade, sizing positions to keep realized drawdown inside a 4% daily loss cap.

SKILLS & CERTIFICATIONS

Technical Skills: Bloomberg, Python (pandas, NumPy), Excel VBA, R, WebSocket Exchange APIs

Certifications: CFA Level II Candidate (2026), CFA Level I above the 90th percentile

Trading & Markets: Arbitrage, Options pricing and volatility surfaces, Delta/gamma hedging, Derivatives, Market making

Languages: Turkish (native), German (fluent)

Interests: Competitive basketball (former team captain), Soccer, Travel across 35+ countries, Poker, Catan
